Cultural Hints

Iris are without doubt the most satisfactory of all garden flowers. Hardy and so easy to grow. July, August and the first part of September are the best time to plant Iris in this section of the country for best results. If planted later it is well to use a light mulch in cold climates.

They should be planted in a sunny well drained location. Do not plant too deep. The top of the rhizome should be just covered with soil. If planted too deep they will not bloom satisfactorily.

We use Bone Meal almost entirely as a fertilizer, occasionally we use well rotted barnyard manure or vigoro when we have a poor spot of ground.

They should be divided every 3 or 4 years so they do not become too crowded. Planting 3 of a variety in a group gives you a nice clump of color in a hurry.

The rhizomes of some varieties grow larger than others, so do not condemn the small rhizomes too hastily. It may be the normal size for that variety. Most oncobreds have small rhizomes.

HEMEROCALLIS

This popular perennial, commonly called Daylilies are truly the busy man's flower, as they need so little attention. They give such a huge amount of enjoyment for the little care they take. They do well in good garden soil in full sun or partial shade. They are hardy and can be left undisturbed for years. By careful selection of varieties you can have bloom from early Spring until Frost. They may be planted at any time the ground can be worked.

CHRYSANTHEMUMS

We have a fine selection of Early Blooming Chrysanthemums which we raise for our own enjoyment. These include varieties listed in catalogs from 35c to 75c and are the new varieties we have collected in the last few years. In this group are assorted doubles, singles, pompoms, buttons and cushion type. In our climate only the hardier and early blooming varieties are satisfactory. We have had so many requests for Chrysanthemums of this type that we are offering them as a collection, as it involves too much time and work to list them separately.

We will send you 12 varieties, unlabeled for \$2.00, if you wish them labeled, please add 5c per plant extra.

Spring shipment only.
